CISSP

This intense, two-week course provides students a condensed seminar covering the knowledge and expertise required to confidently sit for the CISSP examination. As the first credential accredited by ANSI to ISO Standard 17024:2003 in the field of information security, the Certified Information Systems Security Professional (CISSP) certification proves to be a very challenging exam. As such, students should expect to spend significant hours outside of the core classroom hours for self directed reading and review. Obtaining the (ISC)[2] CISSP certification satisfies the DOD 8570.1-M Information Assurance Technical Level-3 and Information Assurance Management Level-2 baseline certification requirements.

CISSP Class Dates		
Class	Start/End Date	Year
001	19 Oct / 30 Oct	2015

003	16 May / 27 May	2016
004	19 Sep / 30 Sep	2016

NMSC

This five-day course is highly recommended as a prerequisite to the Security+ course. Students are provided hands-on instructor lead training with the tools, skills, technologies, and methodologies covered in the CompTIA Security+ exam. Through exposure and understanding, students who complete the Network Managers Security Course significantly enhance their chances of successfully obtaining their Security+ certification on the first attempt.

NMSC Class Dates
